Education

B.Tech in Computer Science (Specialization in Cybersecurity) GITAM University, Visakhapatnam	2023 – 2027 (Expected)
12th Grade Narayana Junior College, Visakhapatnam	2021 – 2023
10th Grade Ravindra Bharathi School, Visakhapatnam	Completed 2021

Skills

Programming & Scripting: Python, Java, C, Shell Scripting
Technologies: Linux, APIs, Data Structures & Algorithms, System Networking, Security Standards
Tools & Platforms: Git, Docker, CI/CD (Jenkins, GitHub Actions), Cloud Platforms (AWS, Azure, GCP), Cybersecurity Tools (Metasploit, Nmap)
Soft Skills: Problem Solving, Analytical Thinking, Teamwork

Experience

Cybersecurity Intern Intrainz	Remote March 2024 – May 2024
◦ Gained hands-on experience in cybersecurity engineering, mastering tools like Metasploit and Nmap for vulnerability assessment and penetration testing. ◦ Developed proficiency in Linux environments, scripting for automation, and security frameworks to enhance system security and threat detection. ◦ Assisted in building automation scripts for security tasks, contributing to efficient vulnerability management and compliance workflows.	

Technical Lead CHITTI	Remote September 2024 – Present
◦ Designed and developed a student-focused platform, implementing secure development practices and automation for deployment and monitoring. ◦ Managed CI/CD pipelines for iterative product releases, ensuring secure integrations and compliance with security standards. ◦ Collaborated with teams to integrate security tools, enhancing threat detection and data protection in cloud environments.	

Web Designer and Developer Young Compete	Remote May 2024 – Dec 2024
◦ Improved site performance and security through optimized code and automation scripts, reducing vulnerabilities and enhancing user data protection. ◦ Integrated APIs and cloud-based monitoring tools for better security automation and compliance.	

Certifications

-
- ISC2 Systems Security Certified Practitioner (SSCP)
 - Cybersecurity Essentials, Cisco
 - Introduction to Cybersecurity, Linux Foundation

Achievements

- Found critical vulnerability in university site and reported to university; this vulnerability led to student data leakage.
- 1st Runner-Up – Technovate (India Student Conclave by Times of India) winning 40,000 prize money
- Achieved 2nd place in a coding competition, earning 5,000 prize money for a secure transaction system.
- Recognized as Top Performer of 2024 at Young Compete for outstanding contributions to web development.

Projects

Secure Transaction System using Face Detection

- Implemented a secure transaction system using face detection for enhanced user authentication, integrating APIs and security protocols to prevent unauthorized access.

Decentralized Voting System

- Built a decentralized voting system using blockchain to ensure secure and transparent elections, focusing on data integrity and threat detection.

Patient Health Monitor using Wireless RF

- Designed a health monitoring system using wireless RF technology to track patient vitals remotely, incorporating security standards for data protection and compliance.
