Education

B.Tech in Computer Science (Specialization in Cybersecurity) GITAM University, Visakhapatnam	2023 – 2027 (Expected)
12th Grade Narayana Junior College, Visakhapatnam	2021 – 2023
10th Grade Ravindra Bharathi School, Visakhapatnam	Completed 2021

Skills

Programming Languages: Python, Java, C
Technologies: Data Structures & Algorithms, Linux, APIs
Tools & Platforms: Git, Docker, VS Code
Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Collaboration

Experience

Technical Lead CHITTI	Remote September 2024 – Present
- Applied engineering principles to solve complex problems in platform development, collaborating with stakeholders to determine user requirements. - Quickly learned new technologies and incorporated best practices, improving product reliability and performance through iterative feedback. - Managed time effectively in a team environment, completing software projects and enhancing scalability.	
Web Designer and Developer Young Compete	Remote May 2024 – Dec 2024
- Worked with stakeholders to evaluate user requirements and implement features, improving site efficiency by 30%. - Sought feedback to apply industry best practices, enhancing observability and performance in web solutions.	
Cybersecurity Intern Intrainz	Remote March 2024 – May 2024
- Demonstrated problem-solving by troubleshooting tools and implementing security features, collaborating on technical solutions. - Learned new methods in cybersecurity, applying feedback to improve processes and ensure reliable outcomes.	

Certifications

-
- Cybersecurity Essentials, Cisco
 - Introduction to Cybersecurity, Linux Foundation

Achievements

-
- 1st Runner-Up – Technovate (India Student Conclave by Times of India) winning 40,000 prize money
 - Achieved 2nd place in a coding competition, earning 5,000 prize money for a secure transaction system.
 - Recognized as Top Performer of 2024 at Young Compete for outstanding contributions to web development.

Projects

Secure Transaction System using Face Detection

- Developed a software system using Python and computer vision libraries, implementing algorithms for secure authentication.

Decentralized Voting System

- Built a blockchain-based application in Java, focusing on secure coding practices and distributed system design.

Patient Health Monitor using Wireless RF

- Designed and coded a monitoring system using C and embedded programming for real-time data processing.
